### PROJECTS

#### Auto-Complete    React-RESTful API

<https://scrabblegenies.github.io/autocomplete/>

A 90's themed Auto-Complete Application written in Reactjs. Using the datamuse API to call suggestions with each keystroke and provide definitions. Collaborated with three other devs

#### Quote of the Day    JQuery-RESTful API

<https://lobst3rg3off.github.io/JSProject2/>

A RESTful API application using jquery to call an api to fetch and dynamically append a random affirmation with author with each button press from an array of quotes and authors.

#### Movie Suggestifier    Javascript/JQuery RESTful API

<https://2jeffs.github.io/movieMachine/>

A paired programming website using jQuery to suggest movies by having the user search for a word and that then calls the Movie DB API and appends the results to the DOM using JQuery and a Randomizer function.
